

# Terry's story

**Terry lives at the OneCare service at our Neville Court home in Barnsley. Since moving into the house, he manages his own everyday living and his quality of life has improved massively.**

Terry has lived in Sheffield since he was born and experienced a challenging childhood, often sleeping rough whilst growing up.

In 2019, he was referred to Neville Court by his Social Worker, who was concerned over his dangerous hoarding and ability to take care of his own basic care needs - his house didn't have electric, gas or running water.

Since moving into the OneCare service at Neville Court, Terry has progressed significantly and is now thriving in his abilities to take care of his own personal care and hygiene, as well as everyday living skills such as cooking and budgeting.

Terry takes pride in his appearance and is now enjoying freshly cooked meals daily and a clean home environment.

**“Our OneCare service is ideal for anyone who wants to move forward with their life and live more independently. People can practice their living skills with planning meals, shopping, cooking and housework.”**

**Judith Bagley, Manager**

## OneCare at Exemplar Health Care

Our OneCare services support adults living with complex needs to live in a fully equipped house/flat that promotes independence, whilst accessing the care that they need.

It's the perfect home for people who want to develop their everyday living skills as part of their journey from moving out of residential nursing care and into the community, or for those who require complex nursing care and are moving from independent living, but who aren't quite ready to move into a nursing home.
